LEGO® SERIOUS PLAY®

PLAYI and LEGO® SERIOUS PLAY® in HE

ADVANCED TRAINING 4

Purpose:

This advanced training interweaves three main elements; LEGO® SERIOUS PLAY®, play literature and practices beyond LEGO® SERIOUS PLAY®, and genAI-based approaches for learning in HE (e.g. university degrees, professional and formal qualifications, advanced and specialist study).

Content:

We will explore these three elements using a mixture of approaches – building, discussion, presentation, play design and reflection in individual and collaborative forms – to envision and create deep and valuable learning experiences for tertiary development.

Throughout this highly interactive day, you consider the different ways these three elements may apply in your context and start to plan for their use.

Through this workshop you will:

- Deepen your understanding of play-based and playful learning in HE.
- Discover findings from the recent *PLAYI* project on play-based learning using genAI and its relevance for wider contexts.
- Identify, design and test out (where possible) a learning experience combining play, genAI and LEGO® SERIOUS PLAY®.
- Draw on the collective knowledge of the group to inspire and extend your own practices.
- Reflect on and prepare for the changing nature of learning in an age of genAI.
- Review and refresh your knowledge of LEGO® SERIOUS PLAY® in a higher education setting.

All previous **trained facilitators in the LEGO® SERIOUS PLAY® method** are welcome at this training; whether you are new to the use of play and LEGO® SERIOUS PLAY® in HE, or if you already have experience with both. If you want to develop your ability to support formal and advanced adult learning in a new and evolving educational era, this advanced training is for you.

LEGO® SERIOUS PLAY® - REAL TIME CHANGE®

29th - 30th of September 2025
3rd - 4th of October 2025

INT//RFACE

BECOME A TRAINED FACILITATOR IN THE NEW LEGO® SERIOUS PLAY® METHOD

Get Ahead of the curve with Real-Time Change©
co-developed with Prof. Johan Roos and
exclusively offered by Intrface.

WHY A NEW METHOD?

Change initiatives in organizations often fail because people are neither committed to the change, nor convinced they can implement it successfully. This is a costly problem for most leaders and organizations.

This just changed, for the better.

Building on the original LSP method, which fosters psychological safety, insight generation, and team alignment, Real Time Change® takes it further with:

- ✓ **Proven theories** about human development, sensemaking, crisis management, and practical wisdom.
- ✓ **Tools for planning and execution** of change across unique internal and external eco-systems.
- ✓ **Dynamic and research-based exercises** that cultivate drivers of readiness for change among groups.

It provides a broader application for facilitators working with dynamic challenges.

Inthrface exclusively offers this new LSP method (the first one in two decades) designed to help people in organizations constructively getting ready for and dealing pro-actively with change.

THE DEVELOPERS

INTH/RFACE

THE CONTENT

INT/RFACE

The LEGO® SERIOUS PLAY® Real Time Change® facilitator training consists of four intense days focusing on the foundation of the method, necessary warm-up exercises, effective group work and debriefing, and how you can apply it to create value. The training composes of 4 main parts:

PART 1

READINESS FOR CHANGE

We create the needed skills, mindset and environment to deal with change in a constructive way.

PSYCHOLOGICAL SAFETY

MOTIVATION

COHESION

KNOWLEDGE CREATION

ENGAGEMENT

READINESS FOR CHANGE

PART 2

CURRENT ECOSYSTEM

We build and co-create a detailed model of your current ecosystem comprising of the following components: Internal and external perspectives – value perspectives – change factors – key change patterns.

The eco-system is constructed in relation to the following 3 key balances:

WE

LATER

SHAPE

ME

NOW

ADAPT

Finally, we test how resilient the ecosystem is towards change and identify key change and success indicators.

PART 3

FUTURE ECOSYSTEM

We start the construction of the future ecosystem by identifying key indicators of both the future and future trends.

We then build and co-create a detailed model of a future ecosystem and your role within it – striking the right balance.

Finally, we create a solid change strategy and identify the underlying framework and principles that will ensure a successful change.

PART 4

FACILITATION & WORKSHOP DESIGN

We will guide, train and give you the necessary tools, so you can plan and run a tailor-made change workshops.
