

LEGO® SERIOUS PLAY® **REAL-TIME CHANGE®** **CERTIFICATION**

Get Ahead of the curve with Real-Time Change®
co-developed with Prof. Johan Roos and exclusively
offered by Intrface.

A sophisticated framework (which I expected, knowing the LSP method), but what I like about it is the flexibility and adaptability. It is less of a process than other methodologies to facilitate change.

- WILLY STUDER
ORGANIZATIONAL DEVELOPMENT CONSULTANT
& EXECUTIVE COACH, SWITZERLAND.

Inthrface exclusively offers this new LSP method (the first one in two decades) designed to help people in organizations constructively getting ready for and dealing pro-actively with change.

WHY A NEW METHOD?

Change initiatives in organizations often fail because people are neither committed to the change, nor convinced they can implement it successfully. This is a costly problem for most leaders and organizations.

This just changed, for the better.

Building on the original LSP method, which fosters psychological safety, insight generation, and team alignment, Real Time Change® takes it further with:

- ✓ **Proven theories** about human development, sensemaking, crisis management, and practical wisdom.
- ✓ **Tools for planning and execution** of change across unique internal and external eco-systems.
- ✓ **Dynamic and research-based exercises** that cultivate drivers of readiness for change among groups.

It provides a broader application for facilitators working with dynamic challenges.

Micael Buckle, Chief Executive trainer and CEO of Intrface and Professor **Johan Roos**, co-inventor and co-author of the original LEGO® SERIOUS PLAY® method in 1999, co-developed the Real Time Change® method.

Learn directly from the source. Micael Buckle, co-developer of the Real Time Change® method, will facilitate this course – offering participants unique insights grounded in both practice and method design.
